CSAR Service - Management Report

October 2004

This report documents the quality of the CSAR service during the month of October 2004.

A more comprehensive report is provided quarterly, which additionally covers wider aspects of the Service such as information on Training, Application Support and Value-Added services.

This and other such reports are made available through the Web to staff within EPSRC and the other Research Councils, to CfS staff and CSAR Service users. The reports are indexed in a similar way to that which other useful information and news are listed for selection.

1. Introduction

This document gives information on Service Quality and on actual usage of the CSAR Service during the reporting period of October 2004. The information, in particular, covers the availability and usage of the main CSAR Service High Performance Computing (HPC) systems:

- SGI Altix3700/512 (Newton)
- SGI Origin3000/512 (Green)
- ➢ SGI Origin2000/128 (Fermat)
- SGI Origin300/16 (Wren)

The information is provided in both textual and graphical form, so that it is easier to see trends and variances.

October has seen the workload of the three primary systems at variable levels, with the workload on the Altix system Newton continuing to increase.

The CSAR Service has been granted an 18 month extension of service contract until June 30th 2006.

2. Service Quality

This section covers overall Customer Performance Assessment Ratings (CPARS), HPC System availability and usage, Service Quality Tokens and other information concerning issues, progress and plans for the CSAR Service.

2.1 CPARS

<u>Table 1</u> gives the measure by which the quality of the CSAR Service is judged. It identifies the metrics and performance targets, with colour coding so that different levels of achievement against targets can be readily identified. Unsatisfactory actual performance will trigger corrective action.

CSAR Service - Service Quality Report - Performance Targets

			Performan	ce Targets		
Service Quality Measure	White	Blue	Green	Yellow	Orange	Red
HPC Services Availability						
Availability in Core Time (% of time)	> 99.9%	> 99.5%	> 99.2%	> 98.5%	> 95%	95% or less
Availability out of Core Time (% of time)	> 99.8%	> 99.5%	> 99.2%	> 98.5%	> 95%	95% or less
Number of Failures in month	0	1	2 to 3	4	5	> 5
Mean Time between failures in 52 week rolling period (hours)	>750	>500	>300	>200	>150	otherwise
Help Desk						
Non In-depth Queries - Max Time to resolve 50% of all queries	< 1/4	< 1/2	< 1	< 2	< 4	4 or more
Non In-depth Queries - Max Time to resolve 95% of all queries	< 1/2	< 1	< 2	< 3	< 5	5 or more
Administrative Queries - Max Time to resolve 95% of all queries	< 1/2	< 1	< 2	< 3	< 5	5 or more
Help Desk Telephone - % of calls answered within 2 minutes	>98%	> 95%	> 90%	> 85%	> 80%	80% or less
Others						
Normal Media Exchange Requests - average response time	< 1/2	< 1	< 2	< 3	< 5	5 or more
New User Registration Time (working days)	< 1/2	< 1	< 2	< 3	< 4	otherwise
Management Report Delivery Times (working days)	< 1	< 5	< 10	< 12	< 15	otherwise
System Maintenance - no. of sessions taken per system in the month	0	1	2	3	4	otherwise

Table 1

<u>Table 2</u> gives actual performance information for the period of October 1st to 31st inclusive. Overall, the CPARS Performance Achievement in October was acceptable (see Table 3); i.e. Green measured against the CPARS performance targets.

									2003/4			
Service Quality Measure	Nov	Dec	Jan	Feb	March	April	May	June	July	Aug	Sept	Oct

Table 2

Notes:

1. HPC Services Availability has been calculated using the following formula, based on the relative NPB performance of Fermat, Green and Newton at installation:

[Fermat availability x 40/ (40+233+343)] + [Green availability x 233/(40+233+343)] + [Newton availability x 343/(40+233+343)] + [Newton availability x 40/ (40+233+343)] + [Newton availability x 40/ (40+23+343)] + [Newton availability x 40+23+343] + [Newton availability x 40+23+343] + [Newto

2 Mean Time between failures for Service Credits is formally calculated based on a rolling 12 month period.

<u>Table 3</u> gives Service Credit values for the month of October. These will be accounted on a quarterly basis, formally from the Go-Live Date. The values are calculated according to agreed Service Credit Ratings and Weightings.

										2003/4

CSAR Service - Service Quality Report - Service Credits

Table 3

The Service Availability issues are receiving close management attention, to determine the root causes and the most appropriate solutions to overcome the problems at least risk to the overall service.

2.2 Service Quality Tokens

The position at the end of October 2004 is that one of the 487 users has awarded 1 gold to the service; one user awarded 4 black marks to the service during September.

The graph above shows the total number of registered users on the CSAR Service and the number of users holding a neutral view of the service.

The graph below illustrates the monthly usage trend of quality tokens:

The current status of the Stendahl tokens is that there are one gold star and four black marks allocated to the service:

No of Stars or Marks	Consortia	Date Allocated	Reason Given
1 gold star	csn003	29/10/2004	Newton work
4 black marks	cs3025	17/09/2004	Long delay in help with porting software

SUMMARY OF SERVICE QUALITY TOKEN USAGE

2.3 Throughput Target against Baseline

The baseline is shown in GFLOP-Years for consistency with the other information contained within this report.

The Baseline Target for throughput was achieved this month. The actual usage figure was 190.4% of Baseline capacity.

Job Throughput Against Baseline CSAR Service Provision

Baseline Actual Usage in Actual % Utilisation c/w Capacity for Baseline during Period Period (GFLOP Years) Period (GFLOP Years) Has CfS failed to deliver Baseline MPP Computing Capacity for EPSRC? 15.37 29.27 190 4% Baseline Job Time Demands Job Demand above Capacity for Period in Period 10% of Baseline during Period (Yes/No)? Majority of Job Queues contained jobs from Users for more than 97% during period? 4 88% No

Period: 1st to 31st October 2004

3. System Availability

Service availability each reporting period is calculated as a percentage of actual availability time over theoretical maximum time, after accounting for planned breaks in service for preventative maintenance.

3.1 SGI Origin2000 System (Fermat)

The following graphs show the availability of Fermat both in core time and out of core time respectively.

Availability of Fermat in core time during October was very good, with one hardware-related outage on the 26th.

Availability of Fermat out of core time during October was very good, with one short hardware-related outage on the 26^{th} .

3.2 SGI Origin3000 System (Green)

The following graphs show the availability of Green both in core time and out of core time respectively.

Availability of Green in core time during October was excellent, with no outages.

Availability of Green out of core time during October was acceptable, with two outages over the $1^{st}/2^{nd}$ of the month.

3.3 SGI Altix3700 System (Newton)

The following graphs show the availability of Newton both in core time and out of core time respectively.

Availability of Newton in core time during October was good, with two short outages.

Availability of Newton out of core time during October was very good, with one brief outage on the 27th.

4. HPC Services Usage

Usage information is given in tabular form, in Appendices, and in graphical format. The system usage information for the period of October 1st to 31st is provided by Project/User Group, totalled by Research Council and overall. This covers:

٠	CPU usage	Newton:	131,162 CPU Hours
		Green:	165,768 CPU Hours
		Fermat:	14,618.25 CPU Hours
		Wren (Batch):	103.02 CPU Hours
		Wren (Interactive):	236.15 CPU Hours
٠	User Disk allocation	Medium Performance:	115.59 GB Years
		SAN HV:	29.73 GB Years
٠	HSM/tape usage		4,543.30 GB Years

In addition, the following graphs are provided to illustrate usage per month, historically:

- a) SMP (Altix/Origin) Usage by month, showing usage each month of CPU (GFLOP-Years as per NPB), split by Research Council and by system. Overlaid horizontal lines show the overall Capacities.
- b) SMP (Origin) Usage by month, showing usage each month in CPU Hours, split by Research Council and giving the equivalent GFLOP-Years as per NPB. Overlaid horizontal lines show the Baseline and overall Capacity.
- c) Medium Performance Disk, combined Origin and SAN, allocated for User Data by month, showing the allocated space each month in GBytes, split by Research Council. The Baseline Capacity (1.5 Terabytes) is shown by an overlaid horizontal line.
- d) HSM/Tape Usage by month, showing the volumes held each in GBytes, split by Research Council. The Baseline Capacity (16 Terabytes) available will be shown by an overlaid horizontal line.

4.1 SGI Origin2000 System (Fermat)

The Origin2000 was reasonably utilised this month. The groups most heavily using the Fermat system are CSE086 (Taylor), CSN001 (De Cuevas) and CSN003 (Steenman-Clark).

4.2 SGI Origin300 System (Wren)

The above graph shows the utilisation of the interactive system Wren for the month of October.

CfS

4.3 SGI Origin3000 System (Green)

The above graph shows the utilisation of Green for the month of October, which was slightly below Baseline.

4.4 SGI Altix3700 System (Newton)

The following graph shows the daily usage during October for the Altix system Newton.

4.5 Disk/HSM Usage Chart

The graphs below show current disk and HSM allocations and usage.

Shown above is the disk allocation against usage on average of the Medium Performance (MP) disk.

The following graph shows the disk allocation against usage on average of the SAN High Volume (HV) disk.

The above graph shows the total usage of the HSM facility by Research Council.

The next graph gives actual usage of HSM by Consortia.

CSE085 (Sandham), CSN001 (De Cuevas), CSN003 (Steenman-Clark), CSN015 (Proctor) & CSN036 (Woolf) were the major users of HSM resource.

4.6 **Processor Usage and Job Statistics Charts**

Job statistics for Newton:

The above graph shows the number of jobs of the major sizes run in the period 1st to 31st October 2004.

Job statistics for Green:

The above graph shows the number of jobs of the major sizes run in the period 1st to 31st October 2004.

The next graph shows the wait times in hours on Newton for the major categories of jobs, larger jobs requesting tiling across multiple nodes having to wait the longest times.

The chart above shows the average wait time trend on Newton so far this year.

The next graph shows the wait times in hours on Green for the major categories of jobs:

The chart above shows the average wait time trend on Green for the last 12 month period.

Workload on Green during October was fairly evenly spread across all ranges of PEs.

The greatest proportion of work on Fermat for October was in the 17 to 32 PE range, at 50%.

October saw a good spread of work on the Altix system Newton, with most ranges of PEs being well utilised.

The above chart shows Green CPU usage by Research Council during the past 12 months of service.

Origin 2000 CPU usage is shown by Research Council during the past 12 months of service in the above chart.

The following chart shows CPU usage to date of the Altix 3700 Newton.

- 21 -

4.7 Class 2 & 3 Usage Charts

The next series of charts show the usage of the system by the class 2 & class 3 users. The usage is shown by project and identifies the Research Council of the individual projects.

The above chart shows the CPU usage of the Fermat system by class 2 and class 3 users.

The above chart shows the CPU usage of Green by class 2 and class 3 users.

The above chart shows Newton usage by class 2 and class 3 users.

There is currently no MP disk or HSM usage by class 2 and class 3 users.

4.9 Charts of Historical Usage

In all the Usage Charts, the baseline varies dependant on the number of days in each month, within a 365-day year.

The graph below shows the GFLOP Year utilisation by Research Council for the previous 12 months, showing the raise in baseline and capacity with the introduction of the Altix system Newton and subsequent fall following the removal of the T3E system Turing early in January.

The graph below shows the historic SMP/MPP usage on the major systems. The increase in capacity reflects the expansion of the Altix system Newton by an extra 128 1.3Ghz CPU node in July, with the new node being upgraded by a further 128 1.5Ghz CPUs in September.

The above graph shows the historic interactive usage of the Origin 300 system (Wren). Eight of the higher speed 500Mhz CPUs in Wren deliver the baseline capacity equivalent to that which was previously available on the Origin 3000 system (Fermat) for interactive usage.

The following graph details the historic usage by Research council of the Origin 3000 system (Green).

The graph below displays the historic usage by Research Council of the Altix 3700 system (Newton), introduced into the service in October 2003. The increase in capacity reflects the expansion of Newton by a new 128 1.3 Ghz CPU node in July, and the further expansion of the new node by 128 1.5Ghz CPUs in September.

The next series of graphs illustrates the usage of the disk and HSM resources of the system.

The graph above illustrates the historic allocation of the Medium Performance Disk on Fermat and the SAN. From August HSM Cache is no longer displayed, as it has been moved from the MP Disk area to the HP Disk area.

The graph below shows the historic HSM usage by Research Council funded projects, now above Baseline at 48 Terabytes. The primary usage is by NERC.

4.8 Guest System Usage Charts

There is currently no Guest System usage.

5. Capability Incentives

Capability incentives were historically given on the T3E system Turing for jobs of 512 PEs and above. In October 2003 it was announced that discounts for capability jobs available on all CSAR systems had been aproved to include the SGI Origin 3000 system (Green) and the new SGI Altix 3700 system (Newton).

These capability incentives were agreed with the Research Councils to encourage capability usage of the national supercomputers for greater scientific achievement, and offer the following discounts:

System	No of Processors	Discount
newton	192+ CPUs	15% discount
newton	128+ CPUs	10% discount
green	384+ CPUs	15% discount
green	256+ CPUs	10% discount

Discounts are given in the form of refunded Service Tokens.

Changes in usage patterns will be monitored and, subject to reviews, CfS reserve the right to change the incentives at any future date.

The following table displays the capability incentive discounts granted for October.

	Service T	okens Re	funded:	October	2004 Usa	ige		
System	Consortia							
System	csn006						Total	
Green 256+ PEs							0	
Green 384+ PEs							0	
Newton 128+ PEs	10.25						10.25	
Newton 192+ PEs							0	
Total Tokens							10.25	

6. Service Status, Issues and Plans

6.1 Status

The service utilisation in October exceeded baseline.

During the month there was a balanced spread of work across all major systems.

6.2 Issues

There were some periods of system downtime during October, primarily due to hardware failures. These hardware issues were rectified as soon as they occurred.

6.3 Plans

It is planned to combine the 4 x 64 processor original Newton nodes into one 256 processor Single System Image. This work is expected to be carried out during the last quarter of the year, with further details to be announced nearer the time.

7. Conclusion

October 2004 saw the overall CPARS rating at Green with the baseline being exceeded by 90%.

Continued management attention will be given to maximise the throughput of the Service, whilst balancing as fairly as practicable the shares between Projects and jobs of the varying sizes.

Appendix 1 contains the accounts for October 2004

Appendix 2 contains the Percentage shares by Consortium for October 2004

Appendix 3 contains the Percentage shares by Research Council for October 2004

Appendix 4 contains the Training, Applications and Optimisation support figures to the end of October 2004

Appendix 5 contains a breakdown of resource usage by Consortia to the end of October 2004.

Appendix 6 contains a reference table of the Consortium name, the subject area and the PI name.

Appendix 1

The summary accounts for the month of October 2004 can be found at the URL below

http://www.csar.cfs.ac.uk/admin/accounts/summary.shtml
